The only good thing this game have is the art.. This is why you don't buy a game without looking into it a bit first. The stupid key doesn't work. Apparently Valve won't do anything about it either.. game was good how ever wish they had past and current wrestling originizations like ecw,wwf ,nwa /wvcw ,tna stars. I loved this game. So far this is my favorite escape the room game. Easily forgot I was in my living room and found myself avoiding tables and items in the game as if they were real. Its short but sweet. For that reason do not look up any walkthroughs! Save the satisfaction for yourself!! Also this was a good intro to VR game. My aunt said she would just take a look for a minute. She ended up playing this for over a half hour. As a non-gamer everything in this came naturally to her.. This is quite good fun, better than I expected.

For the sale price I got this at. It's a really good buy.

. Repetitive. Awesome art style and very tron-esque. Still, I couldnt just sit through the game doing the same remedial tasks OVER AND OVER AND OVER AND OVER. A cute and well polished little platformer. It's really nice to see the amount of thought that went into creating the levels with many of them including unique mechanics.

It starts off easy, as one would expect, but getting to 100% can be quite a challenge. Still the difficulty never gets completely unfair. Also quite addicting, as I spent much more time in each sitting as I originally planned :P

The dialogs and story have exactly the depth a game of this genre needs xD. I booked this through Trivago online after finding a number of good reviews on their site. After arriving we found they had lost our reservation, the first mistake. They were very nice about it and found us a room anyway, we asked about room service as we arrived late and were told there is a McDonalds just in the next solar system, second mistake.

When we were shown our room we found blood on the bed from what looked like an Alien being born through an unfortunate host. The bathroom had some kind of goo that looked like it came from a slime alien and it was stuck on everything like there had been a slime orgy in there.

The tv had only channels in Klingonese and the remote was broken, the fridge rattled all night and the air con did not work.

To cap it off a couple of large slug creatures from the planet Tatooine had sex continually in the room next door making the whole room shake and we could not sleep.

We told the reception and asked to see the manager but were told the Hotel caters to a large number of different life forms and we were being lifeist.

---

We decided to leave after one night and stayed at the Hilton Uranus which catered to humanoids only and was perfect.

GREAT GAME ♥♥♥♥♥. fun little game that makes you think about what your doing before you open fire on everything unlike some shooters , i also like how it has the overheat system stopping you from jsut holding down fire and hoping you complete the level

. Came for the Thicc grils, stayed for the grind.

No, I would say for \$2 or so this was certainly worth it in terms of time spent - money.

I will also say with the content available, this is sadly a one and done type of game.

. Only two things make me play this so less.

Finite resources and small maps.

Everything else is fantastic.. This is a game where you play as your spirit, soul, what have you, you are dead but you weren't supposed to die yet so you have to go back and discover and listen to your memories. Yea.

The game has terrible voice acting which left me unmoved in any manner, left me unconvinced emotionally, so I couldn't really attach myself to the story, which is what this game is supposed to do. It's mostly about story, and it is presented in a walking simulator format.

The graphics are terrible which is a huge negative, it is a walking simulator, one of the things you have to nail is a world that is pretty to look at.

The soundtrack is in the same realm as most other walking simulator type games, not bad, not great, just... the norm.

I played it for 20 minutes before I quit so I can't go super in-depth about the entire game.

In short it is an ugly walking simulator with bad voice acting that is unable to convince you.

I don't recommend this to anyone, but I wish the developer good luck in their future games, this seems like their first game.

I hope they take more time on the next one and are more self-critical next time.. Zelda 1 in a never ending dungeon that gets harder and harder, and darker and darker. Great classic. They did a good job porting this to more recent operation systems..

Meh. Honestly, I just really wasn't a fan. I can easily see the promise of it though, but I really just found it boring. I'd give it a 5/10.
