References Category:Live video softwareQ: Flex 3 - Set drag location dynamically, based on hover position I'm developing a simple application using Flex 3 with a slider type component. I'm trying to set the drag location dynamically, based on hover position. But the actual drag location is a fixed value, and not based on the hover position. How to set the drag location dynamically based on the hover position? A: I found the solution. The solution is to add FlexMouseEvent. In the

constructor of the my component, before doing anything, add this:

```
FlexEvent.addComponentEventListener( this, FlexEvent.COMPONENT_OVER_MOUSE_OVER,
FlexMouseEvent.create(MMouseEvent.MOUSE_OVER, this) ); In the mouseOver event,
do: MMouseEvent.addEventListener( MMouseEvent.MOUSE_OVER,
function(evt:MouseEvent):void { var drag:DragManager = new DragManager(local); var
sx:Number=0; var sy:Number=0; var xdrag:Number=0; var ydrag:Number=0;
drag.addEventListener(MouseEvent.MOUSE_ENTER, function(evt:MouseEvent) { sx =
evt.stageX; sy = evt.stageY; }); drag.addEventListener(MouseEvent f678ea9f9e
```
